Two different evidence-based exemplary practices will be assessed at separate sites. The Mary McDowell Settlement will utilize Self-Enhancement Inc. program to target 30 high risk African-American youth, ages 15-17, and their families. Emerson House will engage ten mentors and a clinical consultant to adapt the Buddy System model for 30 Hispanic youth ages 11-17 at risk for gang activity. Both exemplary practices will teach pro-social skills and help promote bonding with adults who are trained in effective behavior management and child development.

**FY 99 Funding:** \$228,352

Project Period: 9/30/98 - 8/31/01

Chicago, IL

SM52351

The University of Illinois at Chicago's Mental Health Services Research Program joined forces with the Midwest AIDS Training and Education Center at the Jane Addams College of Social Work and the College of Nursing at the University of Illinois at Chicago to implement and evaluate the effectiveness of comprehensive, HIV-specific mental health curricula for mental health providers. The program will train more than 3,600 traditional and non-traditional mental health and primary care providers in the Chicago area and throughout the State of Illinois. Training is offered in a broad range of settings, including State mental health and drug abuse offices, jails, hospitals, rehabilitation agencies, AIDS service organizations, professional associations, universities, and faith community organizations. Participants are offered comprehensive core training, education on the fundamentals of HIV/AIDS, and specialty advanced training modules, such as the neuropsychiatric complications of HIV/AIDS and ethics. The advanced neuropsychiatric module addresses issues related to the central nervous system and HIV, cognitive and other mental disorders associated with HIV/AIDS, psychological factors that affect HIV medical services, psychotherapy, and psychopharmacology. The core training encompasses six basic areas: epidemiology; neuropsychiatry; psychological and counseling issues; HIV test counseling; psychosocial and social welfare issues; and the cultural contexts of special populations.

*Illinois Federation of Families*

Children and Family Network

Congressional District: IL-06

**FY 99 Funding:** \$50,000

Project Period: 9/30/98 - 8/31/01

Glen Ellyn, IL

SM52672

This project proposes to increase the effectiveness of the Illinois Family Network through its work in collaboration with the Federation of Families chapters in Chicago and Northern, Central, and Southern Illinois. Through these collaborations, the Statewide Family Network will further collaborations; increase membership on local, regional and State advisory bodies by identifying, training and supporting leaders among family members in Illinois. Illinois Federation of Families will strengthen coalitions among family members, service providers, and policy makers. The areas of focus include: education of families to become effective change agents; and technical assistance concerning family involvement in the development, implementation, and evaluation of Systems of Care throughout the State. The target population includes families who have children and/or adolescents with serious emotional disorders and a large group of professional collaborators.

*Farm Resource Center, Inc*  
Coal Miners/Farmers Outreach  
Congressional District: IL-22

Mound City , IL  
SM52223

**FY 99 Funding:** \$600,000  
Project Period: 9/30/97 - 8/31/00

The Farm Resource Center (FRC) will provide outreach services to coal miners, farmers, and their families in Illinois and West Virginia. The FRC has provided mental health and substance abuse outreach services in rural Illinois since 1985 and in West Virginia since 1995. The FRC's outreach activities are designed to ameliorate stress associated with unemployment in rural communities and to increase access to and utilization of mental health and substance abuse services. The target population often is not engaged with the mental health and substance abuse service system due to a lack of available services in rural areas, as well as the cultural values of the population, who often seek to "tough out" mental health and substance abuse issues without seeking professional attention. FRC fills the gap in the service system by reaching out to populations in need and linking them with available community-based services. FRC provides outreach to coal miners, farmers and their families using indigenous workers and established a statewide hotline to address mental health issues such as financial stress, alcoholism, and substance abuse, and domestic violence. Outreach, when carried out assertively, can engage and empower coal miners, farmers, and their families by linking them to needed mental health and substance abuse services.

*Breaking Free, Inc*  
School Action Grant  
Congressional District: IL-13

Naperville , IL  
SM52958

**FY 99 Funding:** \$142,231  
Project Period: 9/30/99 - 9/29/00

The target population include the two elementary schools in Aurora, with predominantly Hispanic children. The comprehensive violence prevention and life skills program is targeted toward children - primarily Hispanic - in two elementary schools. The interventions include: 1) An after school program that incorporates the Smart Moves resistance and life skills curriculum, academic tutoring and homework assistance; 2) Second Step, a curriculum to prevent violence and promote social competence through heightened empathy, impulse control, and anger management; and 3) Family Advocacy Network Club (FAN) providing family support activities such as linkages to local services, parent support, and leadership opportunities to empower parents. The overall goals: to decrease juvenile crime, gang involvement, and substance abuse among youth.

Project Period: 9/30/99 - 9/29/00

NICASA will build consensus of community leaders, parents, and teachers and will implement the evidenced-based Teens, Crime, and the Community practice, adapted to make it culturally appropriate to a student population that is 30% Hispanic. This practice will be implemented in classes in the January 2000 semester. Participants will be 9th through 12th grade students at risk of failure. NICASA is concurrently applying for CSAP's Family Strengthening Grants to implement the parent focus piece of the practice.

*Illinois Department of Human Services*

Springfield, IL

State Performance Indicator Pilot

SM52600

Congressional District: IL-18

**FY 99 Funding:** \$100,000

Project Period: 9/30/98 - 8/31/01

The Illinois Department of Human Services, Office of Mental Health (OMH) is particularly well suited to participate in the pilot project. As one of the original States in the Five State Feasibility Study, planning and data management staff have engaged in a number of activities around the collection and interpretation of performance indicator data. Participation in the Five State Study has provided invaluable information regarding strategies for data collection and reporting, and it has enhanced performance monitoring efforts within the State. The Office of Mental Health will focus on three key areas in this grant project: (1) the implementation of the five State indicators on a pilot basis, with preparation for statewide implementation and integration into ongoing operations, (2) supportive and ancillary activities viewed as important or essential for ensuring the success and ongoing maintenance of the indicator systems developed as the primary product of this project, and (3) the expanded involvement of mental health stakeholders in performance indicators activities.

*University of Illinois At Chicago*  
Community-Initiated Grants  
Congressional District: IL-07

Chicago, IL  
SP08657

**FY 99 Funding:** \$400,000  
Project Period: 9/30/99 - 9/29/02

The primary aim of this program is to evaluate families living in inner-city Chicago. Specifically, this continuation study will test for additional benefits from an intervention delivered during the latter part of the elementary school years. That first phase intervention (called SAFE Children) was delivered 9 at the transition to and during first grade and showed proximal effects on the targeted domains. This continuation provides much needed additional understanding of early prevention for substance abuse among a high-risk and understudied population (inner-city families). This study will determine the magnitude and persistence of benefits accumulated from both phases of preventive intervention and differentiate the effects specifically due to the planned second-phase intervention (a "booster") from those from the first-phase intervention.

*Prevention Partnership*  
Targeted Capacity Expansion for Substance Abuse Prevention  
and HIV/AIDS  
Congressional District: IL-07

Chicago, IL  
SP08870

**FY 99 Funding:** \$295,312  
Project Period: 9/30/99 - 9/29/02

This program will allow for increased program capacity and validate the effectiveness of its integrated prevention interventions targeting youth. This project will use three standardized Health Education & Risk Reduction interventions to target over 4800 African American youth and young adults ages 9 to 19 in the Austin neighborhood of Chicago. Three approaches will be used to change community norms and values which include: A Youth Community Team Approach which uses peer educators, a search conference that will use an organizational development process resulting in a three-year West Side Youth HIV Prevention plan, and both approaches will be supplemented by a bi-monthly citywide community action newspaper which circulates 30,000 copies to Westside residents.

*Children's Research Triangle*  
Children of Substance Abusing Parents  
Congressional District: IL-07

Chicago, IL  
SP08229

**FY 99 Funding:** \$400,196  
Project Period: 9/30/98 - 9/29/01

This program will integrate prevention and intervention services with associated services into the Illinois child welfare system, utilizing a child-centered, family focused model. The goals of this project include: 1) developing a Strengthening Families-based program of prevention/intervention for foster children, ages 6 to 8 years, and their biological and foster families; 2) promoting developmental protective factors and decreasing risk factors for substance abuse for 6 to 8 year old foster children who have been removed from their birth homes due to substance use problems; and 3) increasing birth and foster family support systems and capabilities.

*Women's Treatment Center*  
Starting Early/Starting Smart  
Congressional District: IL-02

Chicago, IL  
SP07977

**FY 99 Funding:** \$576,192  
Project Period: 9/30/97 - 9/29/01

The Women's Treatment Center will evaluate the integration of behavioral health services with a Head Start site located on Chicago's South Side. The intervention group will be taken from two classes and will include 143 African-American children, ages 3-5, to be compared with 151 children receiving traditional Head Start services. A team of two substance abuse/family support counselors, a psychologist, mental health social workers, and apparent-child specialist will be integrated with the Health Start staff to develop individual family service plans. While the substance abuse/family support counselors will be fully integrated into the head Start staff, latter professionals will work with identified families and serve as a resource to the integrated staff. Programmatic efforts will focus on the areas of parent-child relationships, substance abuse, and mental health. The grant initiative is a cross-collaboration among CMHS/CSAT/CSAP.

Family Strengthening

SP08855

Congressional District: IL-07

**FY 99 Funding:** \$96,125

Project Period: 9/30/99 - 9/29/01

The purpose of this program is to identify and test two family strengthening models to determine which family intervention works best in an inner-city community with very high risk families and children ages 6 to 13. The goal of this project is to strengthen the capacity of families through nurturing. As well as to support school-age children in developing healthy behaviors, and increase community capacity to assist families through family skills training designed to reduce risk factors associated with substance abuse and other behaviors among high-risk children.

*Chicago Department of Public Health*

Chicago, IL

Family Strengthening

SP08760

Congressional District: IL-07

**FY 99 Funding:** \$96,013

Project Period: 9/30/99 - 9/29/01

The Chicago Center for Health Systems Development in partnership with Chicago Department of Health will target one predominately African American Community in Chicago's South Side, and one Latino community in Chicago's Lower West Side. The program goals are: to strengthen the parent/child relationship thereby reducing substance abuse; to increase community capacity to implement successful family strengthening model; to identify and adapt a culturally appropriate family strengthening model; build community collaboration and consensus; and to enhance the immediate capacity to assist families. The evaluation results will be carefully documented and presented in project reports, and a report of findings are intended for journal publication.

Round Lake, IL

Family Strengthening

SP08681

Congressional District: IL-08

**FY 99 Funding:** \$96,085

Project Period: 9/30/99 - 9/29/01

NCASA and the Round Lake Community Coalition Bringing Everyone's Strengths Together (BEST) join forces to: identify an effective research-based selective intervention; reach consensus among key stakeholders and; implement the selected model program. This program will increase family resilience, decrease familial substance abuse, and increase the community capacity to assist families. The targeted area is Round Lake, IL and the intervention will focus on high school students, especially 9th grade, and will be enhanced for cultural appropriateness. This program will fill a serious gap in parenting services and expand the areas capacity to offer accessible services.

*State of Illinois*

Springfield, IL

State Incentive Grants

SP08103

Congressional District: IL-01

**FY 99 Funding:** \$3,432,689

Project Period: 9/30/97 - 9/29/00

The State Incentive Grant establishes a partnership between CSAP and Illinois that seeks to reduce substance abuse among youth in the State. This program serves as an incentive for Governor Edgar to examine and synchronize the State-wide comprehensive prevention strategy with private and community-based organizations. The State of Illinois is developing, enhancing, and redesigning the State's prevention systems to reduce alcohol, tobacco and drug use in youth ages 12 - 17. Working committees will develop and implement a prevention plan in the areas of community coalition building, technology transfer/best practices, policy development, and marketing/media. These groups will contribute to both State and local capacity by developing, disseminating and supporting program areas as well as by facilitating a comprehensive statewide marketing and media campaign.

Targeted Capacity Expansion for Substance Abuse Treatment  
and HIV/AIDS

TI12242

Congressional District: IL-04

**FY 99 Funding:** \$482,300

Project Period: 9/30/99 - 9/29/02

The purpose of the project is to expand the services currently available to adult Hispanic males within the City of Chicago, who are injecting drug users and are diagnosed to be appropriate for either outpatient or intensive outpatient treatment. Needs assessment data will include information on the increasing spread of HIV infection and other infectious diseases among residents in six targeted communities. It is proposed that 250 intensive outpatient and 300 standard outpatient clients will be reached.

Targeted Capacity Expansion for Substance Abuse Treatment  
and HIV/AIDS

TI12184

Congressional District: IL-07

**FY 99 Funding:** \$526,073

Project Period: 9/30/99 - 9/29/02

The CORE Center, the largest provider of HIV services in the Midwest, is proposing targeted capacity expansion and enhancement within its existing chemical dependence services. The CORE Center, a 60,000 square foot State of the art ambulatory outpatient facility for the prevention, care, and research of infectious disease, opened in October 1998.
